

ABOUT US

ORIGIN

Public Health
Prevent. Promote. Protect.

In 2004, the Morris Regional Public Health Partnership (MRPHP), a non-profit entity, was formed to assist local health departments and other health/human services' organizations with the delivery of public health services.

MISSION

To improve the well-being of Morris County residents

This is a multi-dimensional effort which includes performing a community health assessment to identify the most pressing health issues in the county, followed by implementing a community health improvement plan to address those issues.

NORTH JERSEY HEALTH COLLABORATIVE

The most recent assessment was performed in 2016 through New Jersey Health Collaborative of which the MRPHP is a founding member. The NJHC is comprised of over 100 organizations in 5 counties, across multiple sectors, ranging from hospitals to local health departments, food pantries, and park commissions.

MORRIS COUNTY

Morris County, like all counties in New Jersey, is faced with complex health problems that impact the quality and longevity of peoples' lives. The MRPHP is committed to finding solutions to those problems by working collectively with our partners to create the greatest impact in improving health.
